

# 2021 ACWA Water Quality Modeling Workshop

Hosted by the Association of Clean Water Administrators (ACWA) in partnership with USEPA

**SAVE THE DATE** – ACWA, in partnership with USEPA will be holding a 3-day virtual workshop on Water Quality Modeling. This workshop will take place **September 20 – September 22, 2021, from 1-5 PM EST.**

Sessions will take place through GoToWebinar and registration is required. This workshop is limited to State, Federal, and Tribal participants. We encourage you to distribute this information widely to your partners.

This year's workshop will feature 2 tracks that attendees may choose from:

- Data Visualization.
- Using Open-source scripting to streamline modeling tasks.

The Data Visualization track will focus on:

- The principles of data visualization
- Overviews of common tools
- Overviews of existing post-processing tools

The Open Source track will aid you in the following:

- Understanding the current landscape of data tools and resources for TMDL development.
- Making the software accessible and show how it can make day-to-day work easier.
- Focusing on real world applications of code.

We have a great planning team of state and EPA representatives working hard to put together an agenda. An updated agenda and registration links will be sent in the following weeks.

When available, more information may be found on ACWA's events page:
